STRETCHER TROLLEY

Our primary objective is your *satisfaction*. Our *requirements* are as exacting as we would expect as a customer.

By supporting you from defining the product and throughout its life, we guarantee *high-performance* products, and a *responsive* and *high-quality service*.

We try, with humility, to *understand* your *use*, your *constraints* and to redefine the circuit of your patients to *improve* your *working conditions* and the *efficiency* of your *organization*.

We base our relationships on *shared trust*, making it our priority to be by your side for the *long term*.

PAGE 3

UNDERSTAND YOUR USE, YOUR **CONSTRAINTS**

Variable bi-lateral hight

Its high-quality hydraulic columns can withstand over 30,000 cycles. Its long lever arm reduces pushing effort: real comfort for staff.

Hygienic mattress

Velcro-free, cleaning the mattress and hard surface is easy. The cover is resistant to decontaminants and the zipper is protected from liquids. From 8 to 15 cm (3 to 6 inches), it offers the patients comfort, even over a long period.

Retractable handles

Their ergonomic shape make pushing easy and comfortable Made from ultra-resistant plastic, they don't rust.

Resistant barriers

Equipped with two rotation axes, they are 10 times more resistant than the standard. The side button positioned on the foot side is easily positioned for staff while remaining inaccessible to patients. They can be retracted under the sleeping surface, making transfers easy.

Reinforced wheels

Each wheel supports a load of 220kg (485 lbs). The thick tire absorbs shocks and the rolling noise. They are waterproof as well as dust-proof. Compatible with all types of flooring, including tarmac.

Corner protections

Its shape was specially studied to absorb impacts. Highly resistant, the part can also be removed and recycled. Three colors are available to differentiate stretchers between departments.

Lowering, Trendelenburg and Reverse Trendelenburg positions

Positions are operated with the foot, on each side of the stretcher: easy to access, even with sterile, dirty or occupied hands. The pedals are placed ergonomically, at an easy height for each user.
5th guide wheel

Intuitive and easy to guide, the fifth wheel considerably reduces staff pushing efforts. Regardless of the weight, the stretcher is light and easy to handle.
MOBILITY

Our stretchers have been designed to make your daily life easier

We understand that your time is precious. Each second counts. That is why our stretcher is so easy to use. Its fifth directional wheel makes it light and intuitive. Controlled by the same pedal as the other wheels, it can be set up without even having to think about it. Its reinforced wheels can adapt to any type of floor or obstacle. Its push bars perfectly fit the shape of your hands. **Improving your working conditions is one of our priorities.**

Guaranteeing the safety of your patients

Patient safety is not optional. The stability of our product is such that even when placed in the least favorable conditions, the stretcher does not tip over. In an emergency, the Trendelenburg or Reverse Trendelenburg or CPR (cardiopulmonary resuscitation) positions can be reached within seconds.
RELIABILITY

High-quality components,
Long-term use,
A reduced environmental footprint

Our environmental aware-
ness has led us towards an
eco-friendly design.
BMB MEDICAL is con-
cerned about the ecological
impact of its products at each
stage of their life cycle.
This commitment is reflect-
ed in actions in relation to
packaging, the "4R" policy
(reduce, replace, recycle, re-
cover) and work on materials.
Our products are designed
in accordance with standard
IEC60601-1-9, that defines
the requirements for
eco-friendly design.

Our products are tested on a testing bank with constraints
that are significantly higher than those it will be subjected
to in daily use. Our columns require no maintenance. Our
sleeping surfaces are made from compact laminate, an
extremely resistant and rot-proof material. Our corner
protections are resistant to shocks and aging. Our barriers
with two rotation axes are particularly robust. **Choosing**
BMB MEDICAL is a guarantee of quality but also offers
significant savings on your maintenance budget.

MOTORISED I-CARE EZ-GO EMERGENCY

Comfortable

Adaptable many options available

Easy to use, motorised

Versatile, adapted to different hospital services

I-CARE is a patient trolley with height adjustment on hydraulic columns.

Stable and robust, it is ideally designed to an intensive use.

Its features and its wide range of accessories make it especially suitable for Emergency, OR, PACU or ASC settings.

I-CARE EZ-GO EMERGENCY

74/84 cm

64 to 96 cm

NON CONTRACTUAL PHOTOS - ACCESSORIZED PRODUCTS

Combining lightness, robustness and intuitiveness, our STRETCHER TROLLEY range is suitable for patient transfer, emergencies and recovery room.

On request, many options allow a perfect match to your needs.

Motorized stretcher

- Motorized drive system with autonomous wheel
- Integrated battery. 15 km autonomy. Charge time: 5 hours. Lithium battery without memory effect
- Forward/Backward twist grip with progressive speed acceleration (foot-end)
- Push bars foot-end
- 2-sectional resin mattress base: 60 x 197 cm or 70 x 197 cm
- Radiolucent material
- Height adjustment range : from 64 to 96 cm (with 10 cm thick mattress)
- Trendelenburg / Anti-Trendelenburg 18°
- Two-sided + foot or head-end height adjustment and Trendelenburg / Anti-Trendelenburg adjustment
- Removable mattress made of high quality and resilience foam (35kg/m3), height : 10 cm
- Removable cover. PVC coated Jersey. Colour : grey
- 6 holders for IV pole
- Bumpers on all 4 corners
- Backrest adjustable by 2 gas springs (0 - 90°)
- Castors with central braking system Ø 200 mm at foot- and head-end
- 5th retractable and directional wheel (motorized wheel)
- Antistatic system
- Drop-down side rails. Anodized aluminium
- Frame cover (removable for easy cleaning and maintenance) including utility tray and O2 tank holder
